AD PACKAGES

• Multiscreen Sitebranding	21
----------------------------	----

General Information

DELIVERY

Please deliver the ad at least 3-5 business days before the campaign starts via email to the address DISPO.WMP-Digital@wekanet.de. Please provide the customer name, campaign name, campaign period, target URL and your contact person for ad management. In case of a change of advertising material, please let us know which motif and which placement it is. Please adhere to the maximum file and pixel sizes of the different advertising formats. All special ad forms that are delivered as a redirect must not be positioned "absolutely".

TECHNICAL CONTROL

Upon delivery, the creatives are subjected to an inspection to ensure that they meet the technical specifications. Unfortunately, we have to reject creatives that does not meet these specifications and ask for revision. Despite checking, problems may occur even after the campaign or flight has started. We reserve the right to exclude advertising media in whole or in part from broadcasting if:

- there are massive complaints from the user after the campaign has started
- it subsequently emerges that the creative is disrupting the performance of the site or the user's computer
- an external creative was subsequently changed without consultation and does not meet the specifications
- the advertising material misleads the viewer/user

TRACKINGS

External tracking pixels, which analyze and record user behavior and, if necessary, match it through a downstream database on the customer side, must comply with the guidelines of the EU General Data Protection Regulation (GDPR) and, in addition, the provider must be represented as a certified partner on our data protection page. (Post-bid blocking pixels are not allowed).

General Information

DEVIATIONS

Counting deviations in delivered ad impressions caused by selective filtering of an external tracking pixel (e.g. Ad Verification Pixel) will not be accepted by WEKA MEDIA PUBLISHING GmbH or settled in favor of WEKA MEDIA PUBLISHING without prior agreement, unless they can be proven by a validated data basis.

MOTIVES

Standard is one motif per booked placement. In the case of motif split, a limit of max. three motifs per placement must be taken into account and one motif change per week is permitted for physical delivery.

HTML-CREATIVES

To ensure that no files are lost, please deliver all images and HTML fragments in a ZIP file.

HTML ad media must be UTF-8 compatible.

The HTML5 ad media must be delivered as an iFrame redirect. Physical delivery is currently only possible in exceptional cases and after prior consultation!

In the case of physical delivery, all elements of the advertising material must be compressed in a zip file and relatively linked, including an index.html file as the starting point and all embedded scripts. Excepted are externally loaded libraries, videos and fonts.

General Information

SOUND

Creatives may only start with deactivated sound effect. The sound may only be activated by a clear user action (by click or mouseover).be activated.

The sound may only be played once and may not be repeated (no loop).

There must be a clearly visible option on the creative to deactivate the sound, e.g. marked by the words "sound on/off", "sound on/off" or a stylized loudspeaker.

We reserve the right to reject creatives with "aggressive" sounds or inappropriate volume.

If the sound is subsequently downloaded from the creative, then it must be ensured that the reloading process only starts when the page has been completely built up ("Polite Download"). As a rule, it is sufficient to delay the reloading process by approx. 5-10 seconds.

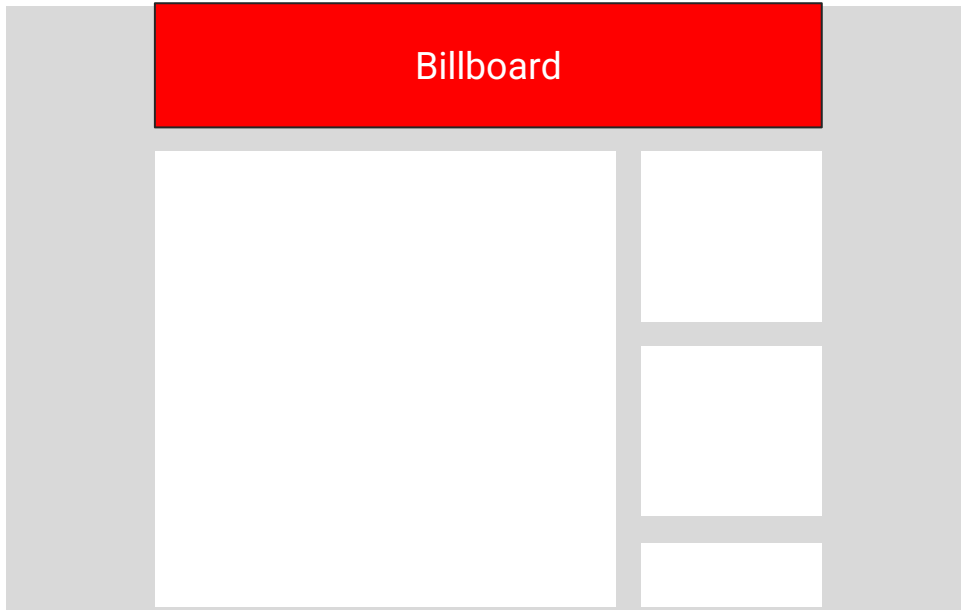

If you want to use sound effects/music in your creative, please bear in mind that this is handled differently by the various websites (publishers). Please ask our SalesTeam for details.

PRODUCTION

The sizes of the creatives are based on the IAB standard advertising formats. Different specific sizes can be placed after consultation with the ad management of WEKA MEDIA PUBLISHING.

The creatives must be optimized with regard to the specified file sizes. It is advisable to use scalable vector graphics for this purpose
